**blended** fuels

*ABOUT ALTERNATIVE FUELS: Alternative fuels such as alcohol blends and biodiesel blends are becoming more available in the marketplace. Blended fuels are evolving, the processes are improving and blending formulas are changing. GPI is in step with the fuel industry when it comes to use of these alternative fuels. GPI equipment has been tested and approved for use with gasoline (alcohol blends E-15), diesel fuel (biodiesel blends B20) and kerosene. This includes GPI pumps, meters, filters, hoses and nozzles identified in this booklet by the graphic displayed here. Special pumps are required for use with **B100** fuels. Six B100 pumps are included in this booklet.*

Did you know you can design your own Pump System to fit your unique application? GPI offers a line of products specifically for this purpose. Pieces and parts allow the end user to tailor the pump system for their particular needs. Pick up the M-150S-E shown in the list below. Then start building your own system. It's as easy as 1, 2, 3.
